INTRODUCTION TO GREAT APES NFT

A social unit...

GREAT APES NFT are settlers on the Solana blockchain. Their antique documentation tells a story of their voyage after a horrible storm engulfed their peaceful community in an erstwhile ecosystem; *the Laynx village*. In a scroll exhumed from **Adroph, the Apes God** tomb by **Basquait**, an artist in the cave of Manhattan Lower East side was buried the story of **GREAT APES**. Adroph knotted the scroll in his decomposed right hand with the caption; **Great Apes** inscribed from the cooling of a hot gold larva.

'In time and space lived a community of Apes... a colony bond in unity and harmony, forging an ecosystem melted by the heat of flames in echoes of their voice and quest for oneness and longevity' It read. Basquait knew he had to paste the words of Adroph in a virtual world but then he continued.

'Then, came a storm; in a blink. The long respected and upheld community of Apes became history and now with a new responsibility to explore, survive, live or extinct. An Ape clan swam the storm escaping the despicable hands of thunderstorms and the dreadful sight of lightening into a new ecosystem; the Solana ecosystem'.

'With numerous other existing clans, unfamiliar values, roadmaps, culture, vision and mission statement the battleline was drawn and the combatants were girded in an arena tournament. A fierce gazing crowd held up in a tantrum with no retreat. The only message each gaze sent was live or die. This Ape clan held up above water level started a new vision-driven and goal-oriented roadmap, outsmarting existing projects (clans) with its team strength, with a bundle of uncracked utility and an edifice of posterity, promoted and backed by other individuals from every clan and neighbouring communities conquered and rose to become **GREAT APES** in the Solana blockchain with the largest community there have ever been'.

Basquait since his discovery of the scroll of **Great Apes** has been inquisitive in his artistic work on the answers to the reason for the first attack on the Apes ecosystem? Who attacked the Ape planet? Who is Adroph? How did this Apes survive the thunderstorm and lightening in their colonies? What other creatures existed in their new ecosystem? How could they have subdued an existing community to become **Great Apes**?

GREAT APE NFT is a virtual collection of the experience of the Ape clans who survived the storm that disunited them. An in-game protocol that drives one through the adventure of the Ape clan with a Play-to-Earn (P2E) reward. **GREAT APES NFT** gives you a decentralized platform to own this ape avatar, interact with other players and create answers to Basquait's questions. You can now start your own journey telling your story as you escape the thunder and lightening and other challenges. Find your way to the top with your team of Apes as you become the next **GREAT APES** of the Solana blockchain. Do you want to wear the crown and top the rank in the leader board start by owning an Ape avatar as you drive your way to glory? See you at the top.

The Nightmare...

The Ape Storm is a jungle metaverse; in a forest filled with thick trees, plants and other animals. The only word that describes this ecosystem better is **DANGER**. You could die taking a walk or taking a nap... the wildlife wrote their will in their teen as aging was never promised. Death is a non-fiction... you are a prey for anyone you want to prey on. The tropical trees housed the birds and the chirping crickets are the **voice of the night** maybe other animals enjoyed their rhythmical sounds after sunset. Apes lived in the mountain top in their clusters beating their chests daily as a **sign of freedom**. This is the **Denizen stage**. Players are rewarded for risking the serene mountains to hunt. The scarier the beast defeated the higher the points and reward earned. Gamers will join globally to participate in this stage, in the Ape Colony once you complete a task you are promoted to the next stage leaving other Apes behind.

As you unlock the **Survival stage**, wind rushes across the thick forest exposing every hideout, cold chill grips every flesh tearing up jaws then drops of water patter the dry lands, wailing birds headed South. The eyes of the sky shined, welcoming the rumbling thunder. In split seconds the jungle is swallowed by flood; one headed with no direction separating families, clans, relationships, smashing heads against rocks and trees.

A new task is unlocked... to survive or die. In this stage you can swim your way to the dry land, drown or die. The ammunition store can provide you with what to survive with using your claimed reward or purchasing a new item, even a boat.

Imagine being in the middle of the ocean with no basic knowledge of swimming and you must survive? Complete this task and unlock new reward in the primitive Ape Colony.

THE APE ADVENTURE

Coerced change...

Surviving the storm, you land in a new ecosystem; the Solana blockchain. Tall structures replaced tall trees, objects moved faster on a rock than the ostriches honking at the green and red lighting that never ended while another bigger than the bird made humming sounds as they flew in the sky. The lousiness here became scarier. You are challenged with a responsibility to acclimatize with your new blockchain and fit in then, create a relevance, complete task and earn reward as you prepare for the journey ahead.

You can earn above 10,000 Sol in this stage to prepare for the Arena blood bucket tournament. Your task here will be revealed as the suspense unfolds. This is the ***adventure stage***.

AN OVERVIEW OF THE APE COLONY ECONOMY

...*Profit and loss.*

The Ape Colony economy will be defined as an analytical view of the pro forma income statement of players reward in the Ape colony game. In this section we will breakdown;

- **Player Asset Requirement (PAR);**
- **Player Financing Requirement (PFR);**
- **Player Cash Flows (PCF);**
- **Great Apes Pro Forma Statement of Cash Flows.**

Player Asset Requirement (PAR)

Assets increases the chances of participation and soaring high in the Ape Colony Leader board as the game progresses. A gamer is required to have a minimum of one (1) **GREAT APES NFT** to qualify for the P2E game. Asset ownership will be based on the **in-game-purchase method** hence players are allowed access to the ammunition store. Items can be purchased with Sol however as gamers unlock rewards, they earn free tools which can be resold as the game progresses. The fluctuation in price of items is determined by the urgency of such item. For instance, if a sword is sold at 1 Sol and a sword will determine the survival or death of a combatants the cost of sword may sky-rocket with regards to law of demand-and-supply.

APE GODS are extraordinary beings in the Ape Colony, they are regarded as **GREAT APES** and are eligible to acquire assets with their rewards and funds. All Gamers however are eligible to staking and lending/borrowing of NFTs.

Hence; **PAR** = Minimum cost of participation **multiplied by** (×) Residual in-game purchases.

Player Financing Requirement (PFR)

The **PFR principle** will be defined as follows;

Total asset = Total Sources of Financing = Loans + Gamers' Investment + Retained Earning

Gamers can finance their game experience with their **Total Asset**; a summation of their loan (borrowed NFTs which could be ammunition/items), investment (Purchased items) and rewards (earnings from in-game rewards).

Player Cash Flows

The Player Cash Flows will be defined strictly as *liquidity* thus the available purchasing power of a gamer will be considered as Player's Cash Flow. This is also a difference of in-flow and out-flow in the cause of the player's Ape Colony Session.

Thus, a player's staked NFT may not be considered a cash flow. For instance, if a gamer has staked his armour and there is need to use them with reference to the staking **Terms and Conditions (T&Cs)** such will be unavailable for use until they are redeemed.

Great Apes NFT Pro Forma Statement of Cash Flows

GREAT APES Pro Forma statement of Cash flows will serve as rewards allocated for every completed task in the **Ape Colony Game**.

All gamers will be allocated rewards with reference to the fierceness of task. All rewards are claimable and can be used in the cause of the game. The reward packs are tradable. Thus, **GREAT APES NFT** will not be the only ones to provide liquidity for gamers as one progresses one can advertise claimed rewards for sale. ***A clearer view will be detailed before Game Launch.***

A Property of Great Apes NFT.

AMMUNITION STORE

Load the bullet...

As you transit, you are required to gird yourself for what comes ahead of you. Items stored here (ammunition store) are accessed or owned by gamers with restriction from explosives and missiles; only an Ape God can possess explosives and must be used only when needed to make life miserable for gamers as the stages unfold.

However, in the Arena Tournament gamers are not allowed to possess guns or explosives as the Arena Tournament is strictly a wrestle fight. All gamers can purchase items with regards to stage requirements and with recommendations.

As you unlock a stage a recommendation of arms you will need for that level is suggested and you can purchase them or skip to continue. However, without these arms you can defeat the combat though it may be more difficult with regards to what your opponent possesses in their **Ammunition pack**.

As you progress you can unlock items or get gifted for herculean tasks completed. In that regards you can use or sell them. Ammunitions auctioned for sale by a gamer will be retracted from the owner and displayed in the ammunition store for bidding. Gamers who get to a level and wish to sell their Ape Avatar can advertise them in the ammunition store.

The ammunition store will be considered **GREAT APES NFT** marketplace.

Evolution of the Ape God clan...

As more Ape Gods revolves the quest for supremacy increases. The diversity and subjugation of the lesser clan evolves. The stratification in the Ape colony becomes heated and the wield of power floods above shoulder level. Misunderstanding evolves everyone wears the crown and the policies here speaks only freedom. Anarchy creeps in as Ape Gods becomes a threat to the lives of the primitive Ape colony and their likes (Ape Gods).

What can be done to address this? This will introduce the **Version 2 of Ape Colony Game**. Thus, what do the future hold when thousand of Apes wears the crown as **Ape Gods**?
